

Teacher's Welcome Pack

The Park is set in 25 acres of ancient woodland in the New Forest, now a National Park and Southern England's most extensive area of unenclosed land. Here you will find Europe's largest collection of multi-species otters, as well as owls, deer, lynx, polecats, foxes, Scottish wildcats, pine martens, wallabies, wild boar, wolves, bison and many more species of indigenous wildlife.

The circular forest trail meanders along wooded pathways between the animal enclosures. An opportunity to experience wildlife in its natural surroundings.

You can choose Gold, Silver or Bronze package and we will structure your day to meet the specific requirements of your group.

Whilst many of our talks and tours relate to aspects of the National Curriculum we aim to enthuse and inspire the children about wildlife and the natural environment in general.
